

Lesson 05 Demo 02

Creating a Default VPC

Objective: To set up a secure and isolated network environment that forms the basis for hosting AWS resources

Tools required: AWS Web Console

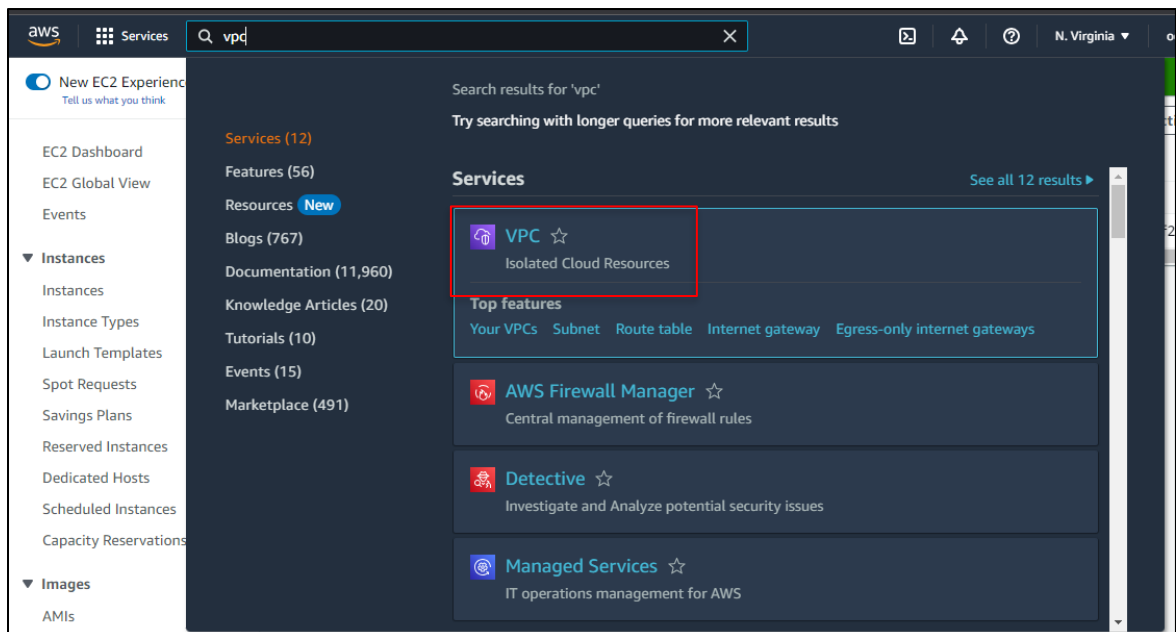

Prerequisites: AWS account

Steps to be followed:

1. Create a default VPC

Step 1: Create a default VPC

1.1 Navigate to the AWS web console and select the **VPC** service

1.2 Click on VPCs

The screenshot shows the AWS VPC dashboard. On the left, there's a sidebar with navigation links for VPC dashboard, EC2 Global View, and various VPC resources like Subnets, Route tables, etc. The main area displays 'Resources by Region' for US East 1. A red box highlights the 'VPCs' resource, which shows 'See all regions' and 'US East 1'. Other resources like NAT Gateways, Subnets, Route Tables, Internet Gateways, Egress-only Internet Gateways, VPC Peering Connections, Network ACLs, Security Groups, and Customer Gateways are also listed with their respective counts and region information.

1.3 Click on Create VPC

The screenshot shows the 'Your VPCs' page in the AWS console. The page title is 'Your VPCs (1/1)'. There's a search bar and a table listing VPCs. The table has columns for Name, VPC ID, State, IPv4 CIDR, and IPv6 CIDR. One VPC is listed with ID 'vpc-0d9c133d4e0dd0456' and state 'Available'. A red box highlights the 'Create VPC' button in the top right corner of the page.

Name	VPC ID	State	IPv4 CIDR	IPv6 CIDR
-	vpc-0d9c133d4e0dd0456	Available	172.31.0.0/16	-

- 1.4 In the VPC settings tab, locate the **Name tag** field, assign an appropriate name to the VPC, select **IPv4 CIDR** manual input, and enter **10.0.0.0/24** in the provided field

The screenshot shows the AWS VPC console interface. At the top, there's a navigation bar with the AWS logo, 'Services', a search bar, and a '[Alt+S]' button. Below this, the 'Resources to create' section is active, with an 'Info' link. It states: 'Create only the VPC resource or the VPC and other networking resources.' There are two radio button options: 'VPC only' (selected) and 'VPC and more'. Below this is the 'Name tag - optional' section, which says 'Creates a tag with a key of 'Name' and a value that you specify.' The text 'Testing' is entered in the adjacent text field. The next section is 'IPv4 CIDR block', with an 'Info' link. It has two radio button options: 'IPv4 CIDR manual input' (selected) and 'IPAM-allocated IPv4 CIDR block'. Below this is the 'IPv4 CIDR' section, where '10.0.0.0/24' is entered in the text field. The 'IPv6 CIDR block' section follows, with an 'Info' link. It has four radio button options: 'No IPv6 CIDR block' (selected), 'IPAM-allocated IPv6 CIDR block', 'Amazon-provided IPv6 CIDR block', and 'IPv6 CIDR owned by me'. Finally, the 'Tenancy' section is at the bottom, with an 'Info' link and a dropdown menu set to 'Default'.

aws Services Search [Alt+S]

Resources to create Info
Create only the VPC resource or the VPC and other networking resources.

☒ VPC only ☐ VPC and more

Name tag - optional
Creates a tag with a key of 'Name' and a value that you specify.

Testing

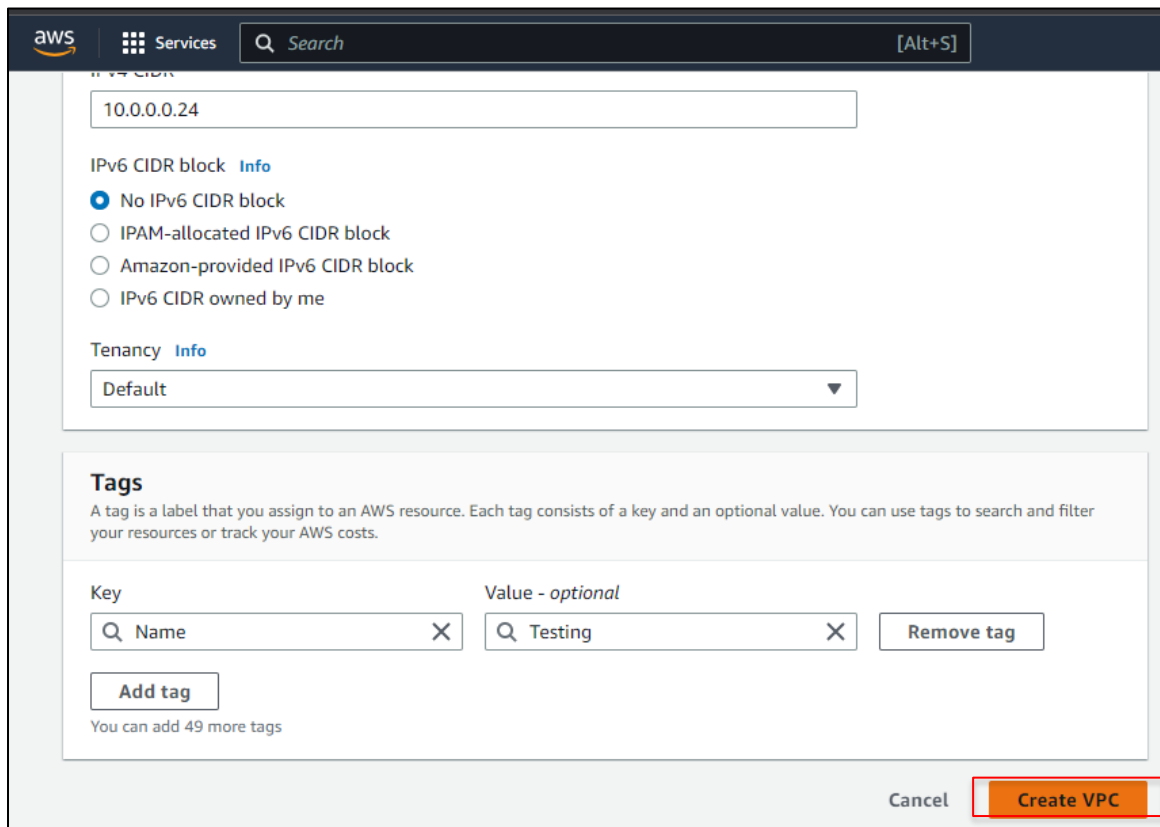

IPv4 CIDR block Info
☒ IPv4 CIDR manual input
☐ IPAM-allocated IPv4 CIDR block

IPv4 CIDR
10.0.0.0/24

IPv6 CIDR block Info
☒ No IPv6 CIDR block
☐ IPAM-allocated IPv6 CIDR block
☐ Amazon-provided IPv6 CIDR block
☐ IPv6 CIDR owned by me

Tenancy Info
Default

1.5 Click on Create VPC

aws Services Search [Alt+S]

10.0.0.0/24

IPv6 CIDR block Info

- ☒ No IPv6 CIDR block
- ☐ IPAM-allocated IPv6 CIDR block
- ☐ Amazon-provided IPv6 CIDR block
- ☐ IPv6 CIDR owned by me

Tenancy Info

Default

Tags

A tag is a label that you assign to an AWS resource. Each tag consists of a key and an optional value. You can use tags to search and filter your resources or track your AWS costs.

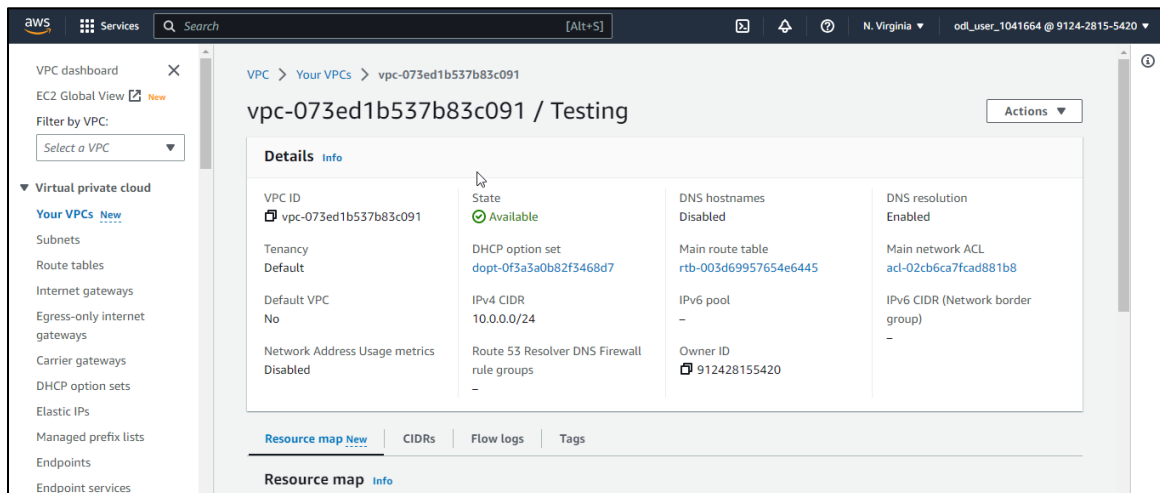

Key Value - optional

Q Name X Q Testing X Remove tag

Add tag

You can add 49 more tags

Cancel Create VPC

aws Services Search [Alt+S] N. Virginia odl_user_1041664 @ 9124-2815-5420
