

## Lesson 04 Demo 01

### Creating an S3 Bucket

**Objective:** To create an S3 bucket using an AWS account for storing and managing data

**Tools required:** None

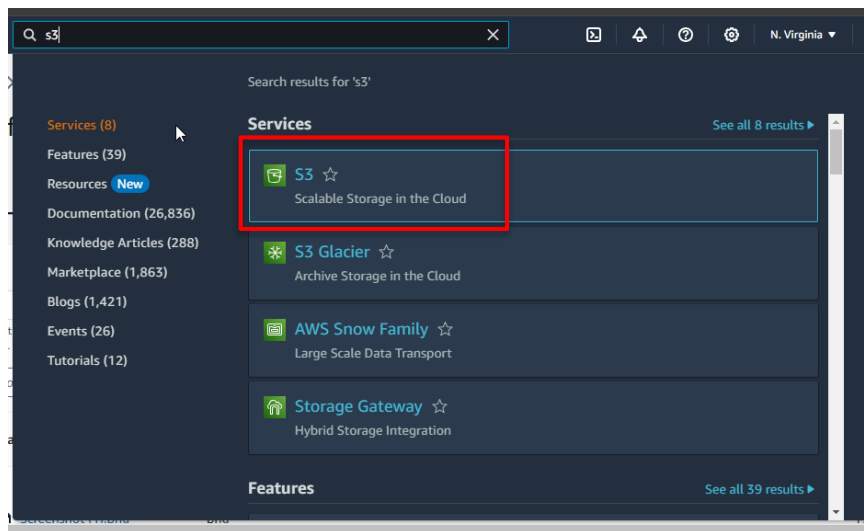

**Prerequisites:** AWS Lab access with an AWS account created

Steps to be followed:

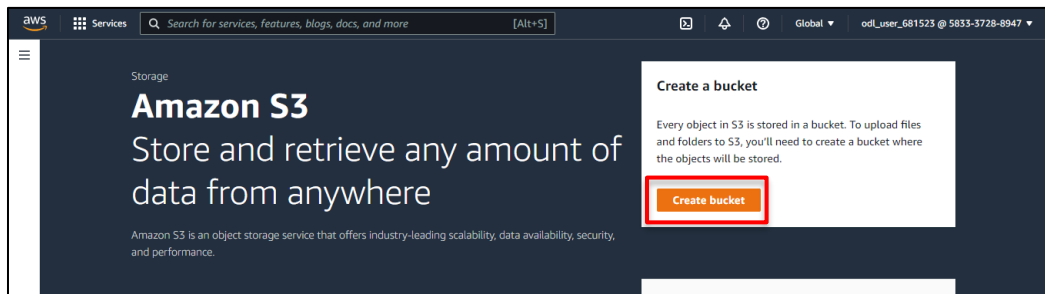

1. Create an S3 bucket

#### Step 1: Create an S3 bucket

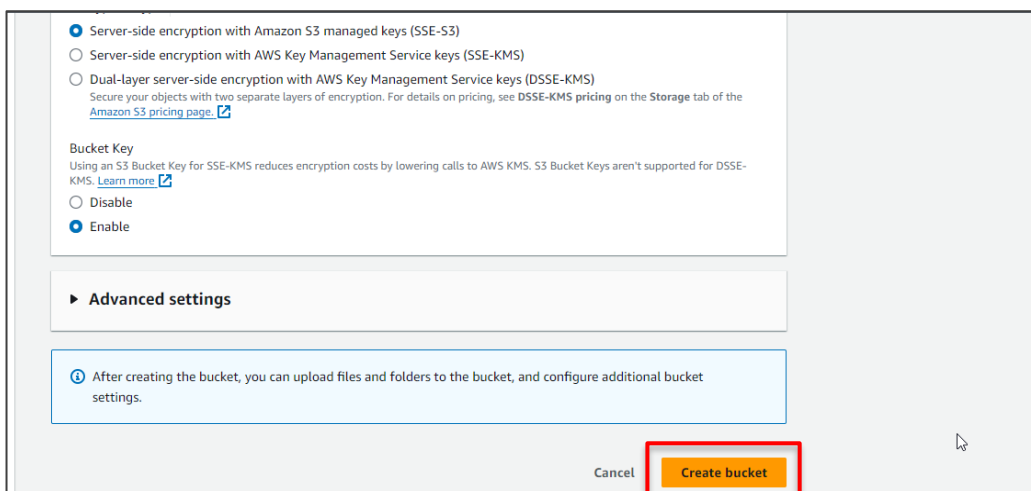

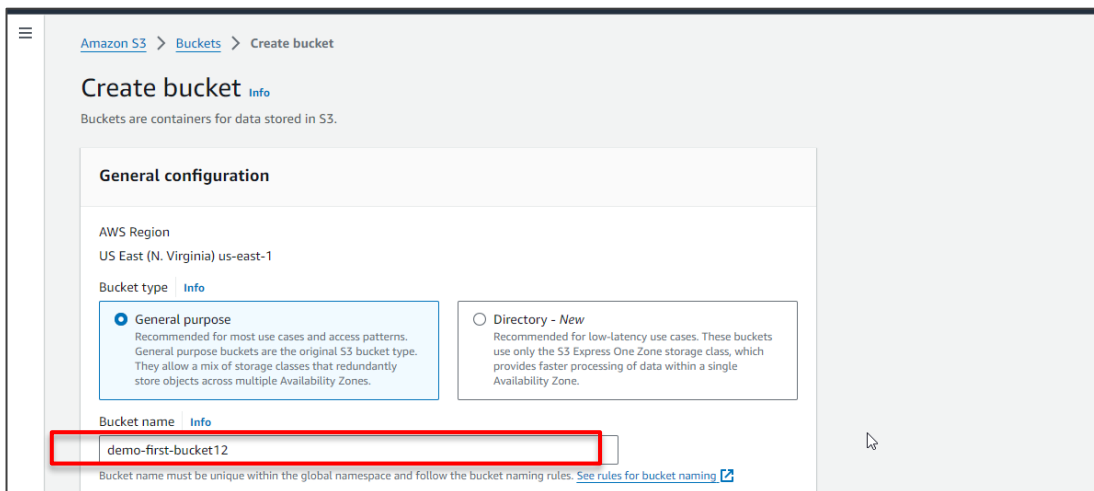

- 1.1 Navigate to the AWS Management Console Home and search for the **S3** bucket

## 1.2 In the S3 Management Console Home, click on **Create bucket**

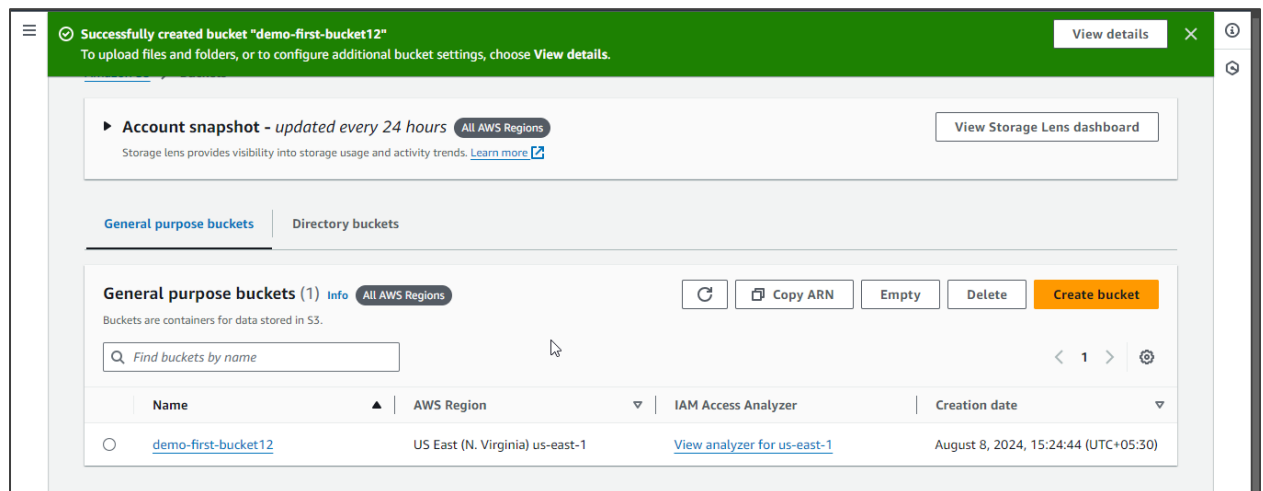

## 1.3 In the **Create bucket** window, enter a name under **Bucket name** and click on **Create bucket**

**Note:** For Bucket name rules, please visit the following website:

<https://docs.aws.amazon.com/AmazonS3/latest/userguide/bucketnamingrules.html>

1.4 Navigate to the S3 dashboard to view the newly created bucket:

By following these steps, you have successfully created the S3 storage bucket for storing and managing data.
