

Lesson 05 Demo 01

Creating Key Pair for EC2

Objective: To create a key pair for an EC2 instance to be used as a security credential for user authorization

Tools required: Amazon Web Console

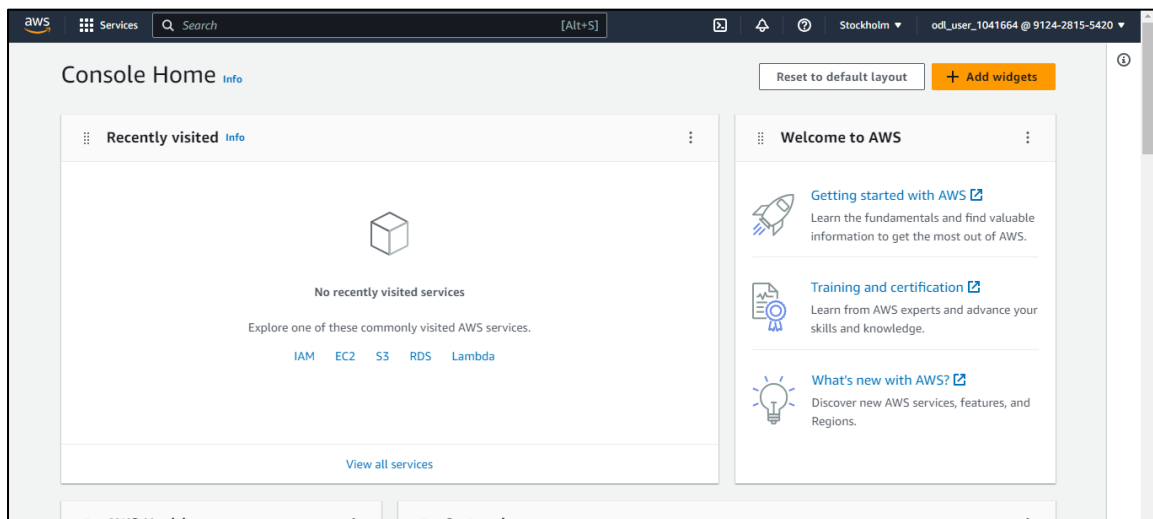

Prerequisites: None

Steps to be followed:

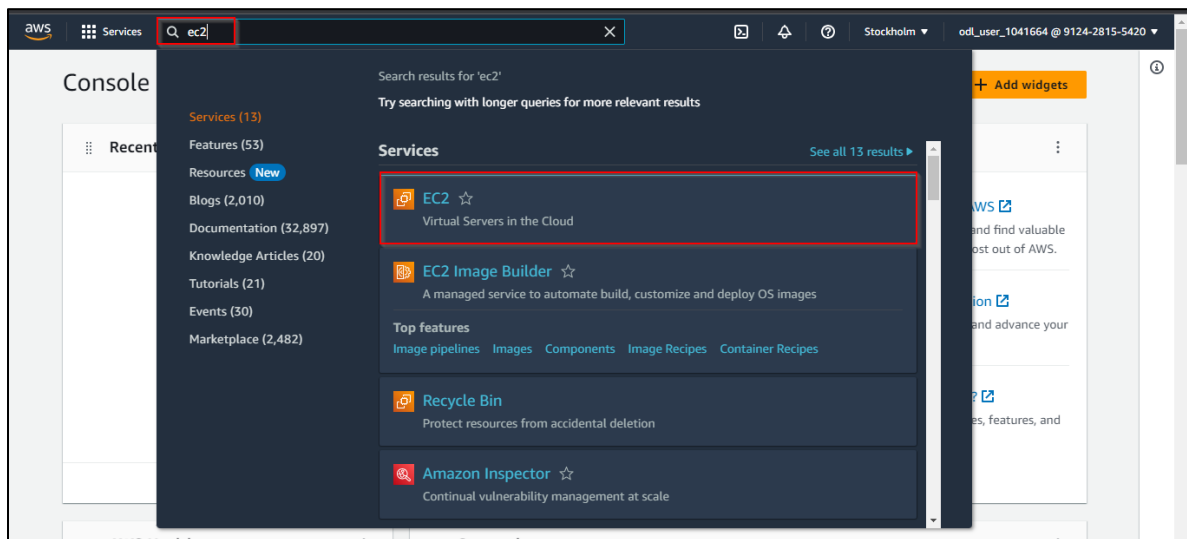

1. Create a key pair for an EC2 instance

Step 1: Create a key pair for an EC2 instance

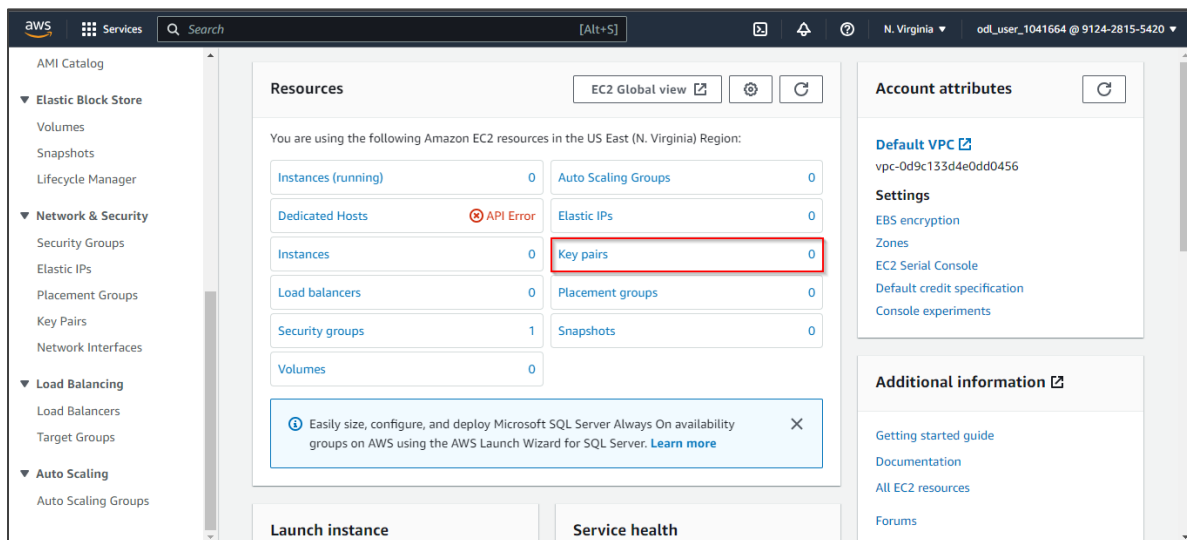

1.1 Launch the AWS Web Console by accessing your Simplilearn lab

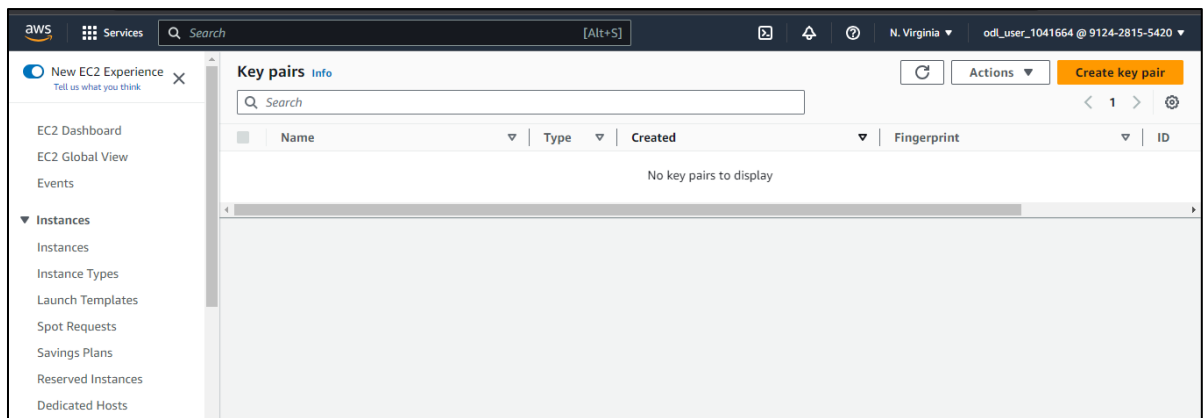

1.2 Navigate to EC2 by searching for it and select **Virtual Servers in the Cloud** under EC2

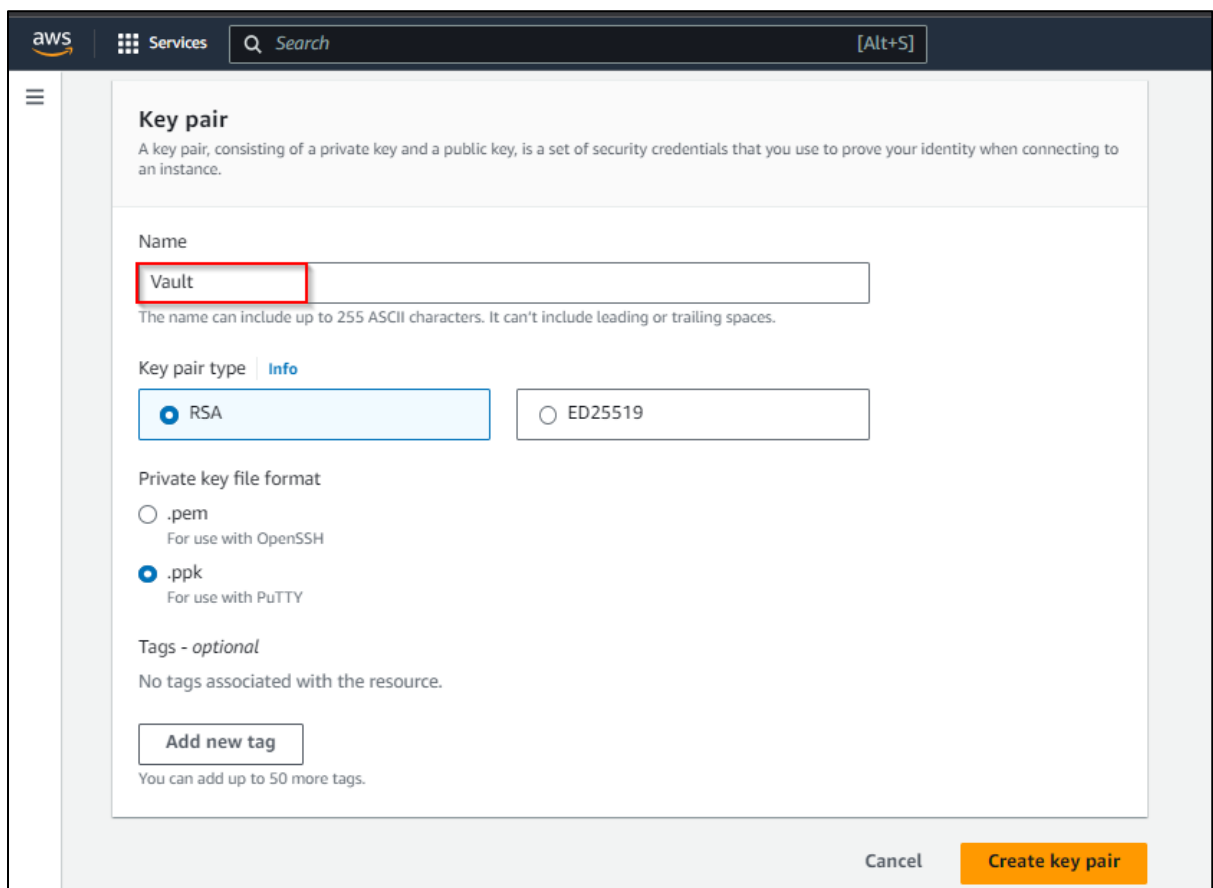

1.3 Click on **Key pairs** under the **Resources** section

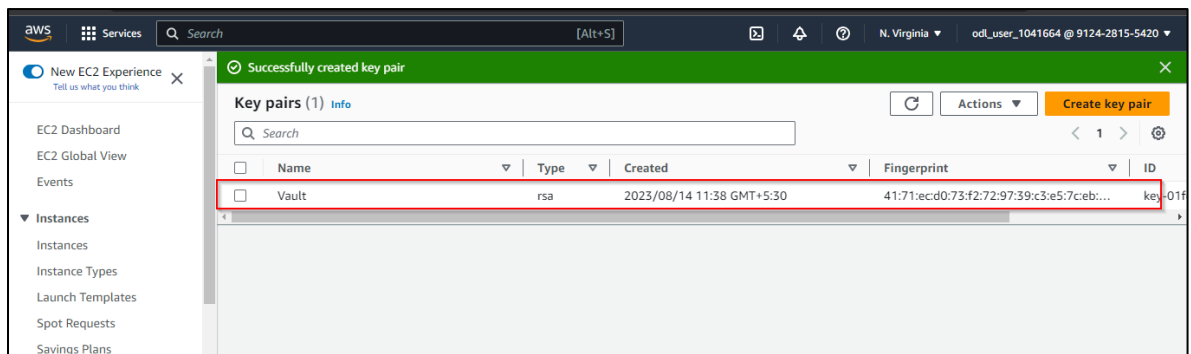

1.4 Click on the **Create key pair** button

1.5 Enter the desired name such as **Vault**, and then click on the **Create Key Pair** button

The key pair is successfully created, which is a crucial component for ensuring secure access to your EC2 instance.

By following these steps, you have successfully created a key pair for an EC2 instance on AWS. This key pair serves as a vital element in establishing secure access to your EC2 instances.
